ELENA

<i>List of modifications</i>	<i>From:</i>	01.400.02.01 / 31/01/2018
	<i>To:</i>	01.400.02.01 / 31/01/2018

Module: General

Notes: 5

Note: ELE-349

The memory usage values shown while an operation is running have been corrected.

Patch Situation 01.400.02.01

Note: ELE-353

The comparison among existing databases generated by previous Elena versions (not Unicode) has been corrected.

Due to the introduction of Unicode support in version *1.4.2.0* with ELE-175, an incompatibility with databases created by previous Elena versions was generated.

For now the key fields (both column name and value) may contain only characters that are compatible with **windows-1252** encoding (that is, the encoding used in previous versions).

Patch Situation 01.400.02.01

Note: ELE-354

Dimensional data are not required for sections not having dimensional data.

A bug has been fixed: previously, due to controls introduced by version *1.4.2.0* with ELE-326, sections without dimensional series would not be accepted.

Patch Situation 01.400.02.01

Note: ELE-355

The list of columns to be fixed has been added to the following warnings:

COM_Error_DifferentColumnsFoundBetweenHeadAndTemplate,
COM_Error_UnknownDimSeriesOrDifferentColumnsBetweenHeadAndTemplate

Patch Situation 01.400.02.01

Note: ELE-358

The obsolete parameter named **history.add_project_in_config_history_path** has been removed: now, the **history.config_history_path** parameter is used as it is; no project name is being added to the path.

If the project being migrated belongs to an Elena version prior to *1.4.1.0*, either the historical files must be manually moved to the folder of one upper level or the project name must be added at the end of the path in the **history.config_history_path** parameter.

Patch Situation 01.400.02.01

<i>List of modifications</i>	<i>From:</i>	01.400.02.01 / 31/01/2018
	<i>To:</i>	01.400.02.01 / 31/01/2018

Module: PM-Aveva PDMS

Notes: 1

Note: ELE-348

The file name and the sheet name indicated by the warning

PM_Warning_DuringSpcomNameComposition have been corrected because they would indicate wrong paths.

Patch Situation 01.400.02.01
