

What's New

ELENA WEB CLIENT

List of modifications

01.400.03.00 - 28/01/2022

Module: Builder

Notes: 1

Note: EWC-117

Fixed the filter on specifications that contain "," in the name

In previous versions it was not possible to filter specifications containing a comma in the name.

The problem occurred when doing this operation:

- *Builder* -> Enable "-f" -> Select specifications that contain "," in the name in "*Select specifications you want to filter*"

Module: Catalogue

Notes: 2

Note: EWC-115

Fixed the deletion of dimensional tables containing "," in the name

In case a comma is used in a key field (for example TAG_CODE), the name of the dimensional table will also contain a comma.

In previous versions, in this case, it was no longer possible to delete the dimensional tables.

The problem occurred when doing one of these operations:

- *Catalog* -> *Delete* (tab) -> Select tables containing "," in the name -> *Delete* (button)
- *Catalog* -> *Delete* (tab) -> Select tables containing "," in the name -> *RemoveTables* (button)

Note: EWC-116

Fixed the downloading of dimensional tables containing "," in the name

In case a comma is used in a key field (for example TAG_CODE), the name of the dimensional table will also contain a comma.

In previous versions, in this case, it was no longer possible to download the dimensional tables.

The problem occurred when doing this operation:

- *Catalog* -> *Download* (tab) -> Select tables containing "," in the name -> *Download* (button)
