Template loaded from templates folder

When creating a new template, if the source file:

- is already in the designated templates folder:
 - if it is already correctly named, it is used without further operations
 - if it is not, it is renamed
- is in a different folder, it is copied in the template folder and renamed correctly

Patch Situation 01.000.03.00

Module: General

Notes: 1

Note: M08-44

Default texts length

Maximum length for default text values is now 2000 characters.

Patch Situation 01.000.03.00

Module: Loader

Notes: 3

Note: M08-37

Non_Unique_UDA_On_Set loading warning

Now the Loader generates the warning Non_Unique_UDA_On_Set when there exist two cells on the same set with the same attribute.

Patch Situation 01.000.03.00

Note: M08-39

Non_Unique_UOM2_On_Section loading warning

Now the Loader generates the warning Non_Unique_UOM2_On_Section when there exist two UOM2 cells with the same attribute in a section.

Patch Situation 01.000.03.00

Note: M08-71

Auto-GetOnly Flag

The new column DISABLE_AUTO_GET_ONLY in the Excel sheet TEMPLATE_LINK let you prevent enablings of OnlyForGet flags on a particular relation.

This is a Boolean column, so you can simply put an "X" (or "true" or "yes" or "1") in the cell to disable OnlyForGet. On the other hand, an empty cell will result in the standard behavior.

Patch Situation 01.000.03.00

Conversions from text formats to date format

With regard to conversions from text formats to date format, in the presence of a 2-digit year:

- on Oracle and SqlServer, up to 49 is considered 20xx, from 50 onwards is considered 19xx
- on PostGres, up to 69 is considered 20xx, from 70 onwards is considered 19xx

Moreover, only on SqlServer, it is necessary for the input format to be absolutely consistent with the one specified by the user at conversion time, i.e. if you specify format is **DD/MM/YYYY**, input string cannot be 9/2/2005 (with 1-digit day and month) but 09/02/2005. If this rule is not honored, the conversion fails and the field is emptied.

Patch Situation 01.000.03.00

Note: M08-11

Automatic setting for text lengths

When you open the Modify cell form, the text length is automatically set to 2000 if it was exceeding that value, and a warning is shown.

Patch Situation 01.000.03.00

Note: M08-20

Attribute domain change

It is now possible to view and change the domain of an attribute, in the "Modify cell" form.

Patch Situation 01.000.03.00

Note: M08-73

Set pre-selection

When creating a new cell, if the current section has only one set, that set is now pre-selected for your convenience.

Patch Situation 01.000.03.00
