<i>List of modifications</i>	<i>From:</i>	01.001.02.03 / 12/01/2016
	<i>To:</i>	01.001.02.04 / 14/01/2016

Module: No subsystem

Notes: 2

Note: TMS-632

Bug correction:

The Progress Values in Progress View e Progress Schedule with Selection C3 > Main WS > Actual Distribution , are now correctly shown.

All values are now taken from C3 values historically stored and the Cut off shown is the C3 cut off

Patch Situation 01.000.04.00

Note: TMS-633

Bug correction:

Now the creation of a Calendar when the import is done and progress is calculated is not more producing error

In this case you have available only the option to extend an existing calendar not the option to create a new one

If you like to create a new calendar from scratch you should first clear all the calculated distributions.

Patch Situation 01.000.04.00

Note: TMS-634

Bug Correction:

Now the problem of creation of a Work Class Structure from scratch is solved.

All the Levels are correctly inserted with the correct icon

Patch Situation 01.000.04.00

Note: TMS-635

Bug Correction:

Several bugs in Main WS creation from scratch was solved - in particular:

- Now you can edit the Main WS Code , the Storing Level and the Spread Data Source
- Now the Proposed Weights are correctly calculated at any level

Patch Situation 01.000.04.00

What's New?

TMS

<i>List of modifications</i>	<i>From:</i>	01.001.02.03 / 12/01/2016
	<i>To:</i>	01.001.02.04 / 14/01/2016

Note: TMS-640

New feature:

Now all the Quantities (Original, Best Estimated, Equivalent Installed) of the C3 Items can have 2 decimals

Patch Situation 01.000.04.00

Note: TMS-642

New Feature:

Now it is possible to store the C3 progress more than one time after saving.

You can select from the pull down a previously stored C3 Cut off , modify it by C3 item e step and store it again.

Patch Situation 01.000.04.00

Note: TMS-643

A Quantity Value = 1 is automatically inserted during autogeneration in case there is no value inputted by the user.

Quantity Value by C3 Item is mandatory in C3 Module in order to have correct progress calculation

Patch Situation 01.000.04.00

Note: TMS-646

New Feature:

Now it is possible to edit the proposed structure in the specs of all Reports where we can select a specific Structure (Main WS, Alternative WS, Activity WS, Work Class Structure)

A yellow background is highlighting the element of the selected structure that are on progress

Patch Situation 01.000.04.00

What's New?

TMS

<i>List of modifications</i>	<i>From:</i>	01.001.02.03 / 12/01/2016
	<i>To:</i>	01.001.02.04 / 14/01/2016

Note: TMS-652

New Feature:

Now, in all the Reports and Progress Views, is possible to see (in addition to the Code) the complete Title of the selected structure when is selected

Patch Situation 01.000.04.00

Note: TMS-660

Bug correction :

Not is is not possible to load P6 Import files that are not in Excel Format (.xls or .xlsx)
A specific warning message is advising the user

Patch Situation 01.000.04.00

Note: TMS-662

New Feature:

Not it is possibile to edit the past historical progress at the following levels:

- 1) Actual Progress at Main WS Lowest Level
- 2) Actual Progress at P6 Activity Level
- 3) Actual Progress at C3 Activity Level
- 4) Actual Progress at Work Class Lowest Level

Actual Units & Weighting Factors are automatically recalculated

Patch Situation 01.000.04.00

What's New?

TMS

<i>List of modifications</i>	<i>From:</i>	01.001.02.03 / 12/01/2016
	<i>To:</i>	01.001.02.04 / 14/01/2016

Note: TMS-665

New feature:

A new command called "WS Node recalculate" allow you (on request) the recalculation at Main WS Lowest Level in case some progress at Activity Level was edited by the user. TMS is detecting the Main WS Lowest Levels that has Actual progress not consistent with the calculation based on edited progress at activity level. The user can select which of the detected Main WS Lowest Levels should be recalculated.

Patch Situation 01.000.04.00

Note: TMS-666

Feature già inclusa in [TMS-662](#)

Patch Situation 01.000.04.00

Note: TMS-667

Feature già inclusa in [TMS-662](#)

Patch Situation 01.000.04.00

Note: TMS-674

Bug correction :

In C3 Module Only now the Import of the excel File in Assign/Refresh Scope is not more causing errorif there is not at least one Activity inside TMS

Patch Situation 01.000.04.00

Note: TMS-680

Now P6 Import files with Activity Codes with a mix of small/capital letters are accepted by TMS without creating errors

Patch Situation 01.000.04.00

What's New?

TMS

<i>List of modifications</i>	<i>From:</i>	01.001.02.03 / 12/01/2016
	<i>To:</i>	01.001.02.04 / 14/01/2016

Note: TMS-1117

It has been solved the problem where in the Project List in the column "Cut off up to" was not immediately refreshed the date of cut off after performing the periodic updating of the project

Patch Situation 01.001.02.03

Note: TMS-1154

It has been solved the problem detected in import of XML files where the addition of white space after the Activity ID entailed an incorrect calculation of progress for some activities

Patch Situation 01.001.02.04

Note: TMS-1155

In case of Import of Multiple XML files in the column "Project ID" of Tab "Import Files" now is not given reference.

Previously it was wrongly indicated only the Project ID of the first project

Patch Situation 01.001.02.04

Note: TMS-1156

It has been inserted a filter on all "accessories" Files used in import for which, when the file size is greater than 20 MB, the file is not backed up or duplicated.

This was necessary since, in some cases, XML files exported (from P6 and / or MS Project) from projects with thousands of activities reached dimensions also greater than 300 MB

Patch Situation 01.001.02.03

Note: TMS-1158

It has been solved the problem detected in the Main WS Import from Excel where the presence of white lines (not valued) in the bottom of the Main WS itself did not allow imports

Patch Situation 01.001.02.04
