<i>List of modifications</i>	<i>From:</i>	01.001.02.08 / 02/05/2016
	<i>To:</i>	01.001.02.08 / 02/05/2016

Note: TMS-1205

It has been fixed an issue that generates error in Main Weighting Structure in case of Transfer of Proposed Weights (with zero values) to Imposed Weights

Patch Situation 01.001.02.08, 01.001.03.00

Note: TMS-1206

It has been fixed the problem that generates error when you exit the screen "Resource"

Patch Situation 01.001.02.08

Note: TMS-1208

It has been introduced a new feature that makes it possible to selectively export one Excel File for each project for P6 Schedule Updating

Patch Situation 01.001.02.08

Note: TMS-1209

It was introduced an automatic filter in Work Class Progress where positioning on a specific activity within a work class are now shown only the deliverables of the selected activity.
Also the totals are recalculated accordingly

In addition it was also implemented the possibility to delete deliverables in progress after having manually zero out the progress for each step

The previously stored progress at the various Cut offs is automatically removed

Patch Situation 01.001.02.08

<i>List of modifications</i>	<i>From:</i>	01.001.02.08 / 02/05/2016
	<i>To:</i>	01.001.02.08 / 02/05/2016

Note: TMS-1218

In the Import Schedule Data, if an XML file exported from P6 (from version 15.1 onwards) contains more projects TMS produces a message warning you that the import will be blocked as currently TMS can not import more projects in the same XML file .

It is however recognized correctly if an XML file contains activities and projects related to one or more external projects.

The activities of external projects will not be imported

Patch Situation 01.001.02.08

Note: TMS-1221

It was limited the maximum length of the Work Class code to 28 characters in order to avoid problems in the generation of the workbook sheetname exported for external data entry.

Patch Situation 01.001.02.08

Note: TMS-1222

It has been solved the problem detected during Export/Import of a single Work Class where it was properly handled only import/export with 4 levels.

Now it is possible a proper import/export of a single Work Class regardless of the number of levels of the Work Class Structure

Patch Situation 01.001.02.08

Note: TMS-1223

It has been introduced a new type of inconsistency that detects if the start dates and end dates of all activities imported TMS are in the range of dates defined in the calendar.

The activities out of range are listed in the report of the inconsistencies with their out of range dates dates.

Patch Situation 01.001.02.08

What's New?

TMS

<i>List of modifications</i>	<i>From:</i>	01.001.02.08 / 02/05/2016
	<i>To:</i>	01.001.02.08 / 02/05/2016

Note: TMS-1224

Now in "Import C3 Item Quantities" the Measure Unit is no longer recognized as "key sensitive" and does not appear in the Simulation Log as a modification of an unit existing measure unit.

And then it accepted with both uppercase and / or lowercase

Patch Situation 01.001.02.08

Note: TMS-1228

It was introduced in "Work Class Progress" the automatic resize of the columns by the maximum content
It was also changed the heading of some columns with more generic descriptions.

The resizing was also applied to export of excel files of single Work Class or all Work Classes

Patch Situation 01.001.02.08

Note: TMS-1229

You can now successfully delete a single deliverable after removing the associated progress in every work step.

It also removes properly the progress for each work step stored at the past cut-offs

Patch Situation 01.001.02.08

Note: TMS-1239

The consistency check on the presence of Code Value is now no longer "key sensitive"

Patch Situation 01.001.02.08
