

# What's New?

## TMS

<i>List of modifications</i>	<i>From:</i>	01.001.03.00 / 21/12/2016
	<i>To:</i>	01.001.03.00 / 21/12/2016

**Module:** No subsystem

**Notes:** 3

**Note:** TMS-1183

It was implemented the function of import (in TMS) of XML Files (exported from Primavera) that contain more projects within each individual file.

This new type of export from P6 is available from Primavera version 15.2

**Patch Situation** 01.001.03.00

**Note:** TMS-1185

It has been completely revised the import in TMS of "P6 Spread Files" and "P6 Task / Milestones files".

In particular, the following improvements have been introduced:

- 1) The Excel Import process has been greatly simplified and made similar to the import from XML
- 2) Now we can import more than one Excel file for each Distribution Type with consolidation in a single project
- 3) Now we can import Task & Milestone Files containing Activities NOT present in the Spread File  
In this case, for the above mentioned activities, the spread is calculated by TMS according to defined parameters and consolidated with the other activities of the P6 spread
- 4) The mapping of the "Spread files" and "Task / Milestone Files" can be done once, and then, automatically acquired by the succeeding files
- 5) It was implemented the possibility to import the "P6 Spread Daily" in addition to "Weekly" and "Monthly" already existing

**Patch Situation** 01.001.03.00

**Note:** TMS-1210

It has been implemented an automatic resize of the columns in the browser of an import file to ensure complete visibility of the filename

**Patch Situation** 01.001.03.00
