

# What's New

## TMS

<i>List of modifications</i>	01.001.03.08 - 18/02/2019
------------------------------	---------------------------

**Module:** No subsystem

**Notes:** 3

**Note:** TMS-1379

### Progress View

Now it is possible to generate any kind of user-defined Alternative Progress View based on Units (i.e Hours) imported from P6.

When you select in Distribution Type the “Period Units” or the “Cumulated Units” you can use a Divisor to transform, for example, Hours in Persons with user-defined decimals and user-defined Label.

If the Divisor is applied to Structures that have not the same Measure Unit a Warning Message will appear.

If you flag “Show Gran Total” and your Structure has not the same Measure Unit a Warning Message will appear.

**Note:** TMS-1417

### New Reports

Starting from this release you can create five new "Statistical & Quality" reports based on the information coming from XML import file from Primavera P6.

- ST-100 Task & Milestones Current Status
- ST-110 Task Duration Dates Floats
- ST-120 Baseline Schedule Quality
- ST-130 Current Schedule Quality
- ST-140 Links Analysis

**Note:** TMS-1422

### New Global Layouts columns

Starting from this release you can choose new "Global Layouts" column types.

These are related to activity properties linked to deliverables.

Now you can also edit the report column headers.
